

# PTS Solder Paste Softener

*Made in Singapore with full after sales service and support.*

**PTS Solder Paste Softener** is so effective that it takes less than 2 minutes for a 125 gm jar of solder paste to be well mixed and to reach a ambient temperature (25 deg. C) from 5 deg. C when taken out from the fridge. No need to wait for long hours for solder paste to thaw to room temperature or to manually stir mix the paste. Eliminate those process variables now by using PTS solder Paste Softener.

**Capacity: Accommodate 2 jars of solder paste (500 /250/125 gms)**  
**Spin Speed: Variable-factory set at 400 RPM**  
**Timer: 0-60 minutes**  
**Safety interlock door. (door locks during spinning)**  
**Dim: Lg: 400 x W40 x Ht.390**  
**Power : 220VAC/Single phase. Max. amps: 2**  
**Colour: Std. Grey**
